

CURRENTLY PRESCRIBED PSYCHOTROPIC MEDICATIONS

Schizophrenia

1st generation antipsychotics:

Haldol (haloperidol), Haldol Decanoate injection
Loxitane (loxapine)
Mellaril (thioridazine)
Navane (thiothixene)
Prolixin (fluphenazine), Prolixin Decanoate injection
Stelazine (trifluoperazine)
Thorazine (chlorpromazine)
Trilafon (perphenazine)

2nd generation antipsychotics:

Abilify (aripiprazole) Injections as: Aristada/Initio/Asimtufii/Maintena
Caplyta (lumateperone)
Clozaril (clozapine)
Cobenfy (xanomeline/trospium chloride)
Fanapt (iloperidone)
Geodon (ziprasidone)
Invega (paliperidone) Injections as: Invega Sustenna/Trinza/Hafyera
Latuda (lurasidone)
Lybalvi (olanzapine/samidorphan)
Rexulti (brexpiprazole)
Risperdal (risperidone), Injections As Consta/Perseris/Uzedy
Saphris (asenapine)
Seroquel (quetiapine)
Vraylar (cariprazine)
Zyprexa (olanzapine). Injection as: Zyprexa Relprevv

Bipolar Disorder

Depakene (valproic acid)
Depakote (divalproex sodium)
Keppra (levetiracetam)
Lithium-Eskalith/Litho-bid-nate-tabs
*Lamictal (lamotrigine)
*Neurontin (gabapentin)
*Tegretol (carbamazepine)
*Topamax (topiramate)
Trileptal (oxcarbazepine)

Treat Substance Abuse

Tobacco Dependence

Wellbutrin (bupropion)
Chantix (varenicline)

Alcohol Dependence

Vivitrol, Revia or Depade (naltrexone)
Campral (acamprosate)
Antabuse (disulfiram)

Opiate/Narcotic Dependence

Bunavail (buprenorphine & naloxone)
Methadose or Dolophine (methadone)
Suboxone/Subutex (buprenorphine)
Vivitrol, Revia or Depade (naltrexone)

Narcan/DAWN Kits (naloxone)

Depression

Tricyclics:

*Anafranil (clomipramine)
Asendin (amoxapine)
Elavil (amitriptyline)
Norpramin (desipramine)
Pamelor (nortriptyline)
Sinequan (doxepin)
Surmontil (trimipramine)
Tofranil (imipramine)
Vivactil (protriptyline)

SSRIs:

Celexa (citalopram)
Lexapro (escitalopram)
*Luvox (fluvoxamine)
Paxil (paroxetine)
Prozac (fluoxetine)
Zoloft (sertraline)

MAOIs:

Emsam (selegiline)
Marplan (isocarboxazid)
Nardil (phenelzine)
Parnate (tranylcypromine)

Others:

Auvelity (dextromethorphan/Bupropion)
Cymbalta (duloxetine)
Desyrel (trazodone)
Effexor (venlafaxine)
Exxua (gepirone)
Fetzima (levomilnacipran)
Oleptro (trazodone)
Pristiq (desvenlafaxine)
Remeron (mirtazapine)
Serzone (nefazodone)
Spravato (esketamine)
Trintellix (vortioxetine)
Viibryd (vilazodone)
Wellbutrin (bupropion)
Zulresso (brexanolone)
Zurzuvae (Zuranolone)

Anti-obsessive Agents

Anafranil (clomipramine)
Luvox (fluvoxamine)
Paxil (paroxetine)
Prozac (fluoxetine)
Zoloft (sertraline)

Listed above are the brand names, followed by the generic (in parentheses) of commonly prescribed psychotropic medications. A second chart on the back of this sheet provides cross-referencing by generic name.

As with all questions about medication, be sure to consult with a prescribing physician or pharmacist for any specific questions you may have about dosage, drug interactions, or side effects.

**Although this medication has been approved by the FDA for the treatment of other disorders, it has not been approved for this particular use. Some evidence of this medication's efficacy for such use does exist, however. This type of medication use is referred to as "off label."*

Reviewed 1/2026

Anxiety Disorders

Atarax (hydroxyzine)
Ativan (lorazepam)
BuSpar (buspirone)
*Inderal (propranolol)
*Klonopin (clonazepam)
Librium (chlordiazepoxide)
Serax (oxazepam)
*Tenormin (atenolol)
Tranxene (clorazepate)
Valium (diazepam)
Vistaril (hydroxyzine)
Xanax (alprazolam)

**Antidepressants, especially SSRIs, are also used in the treatment of anxiety.*

Stimulants

(used in the treatment of ADD/ADHD)

Adderall (amphetamine and dextroamphetamine)
Azstarys(dexmethylphenidate and serdexmethylphenidate)
Dexedrine (dextroamphetamine)
Focalin (dexmethylphenidate)
Jornay (methylphenidate hydrochloride)
Ritalin (methylphenidate) (Concerta, Daytrana)
Vyvanse (lisdexamfetamine)

**Antidepressants with stimulant properties, such as Norpramin and Wellbutrin, are also used in the treatment of ADHD.*

Non-Stimulants

(used in the treatment of ADD/ADHD)

Intuniv (guanfacine)
Strattera (atomoxetine)
Qelbree (viloxazine)

Anti-panic Agents

Klonopin (clonazepam)
Paxil (paroxetine)
Xanax (alprazolam)
Zoloft (sertraline)

**Antidepressants are also used in the treatment of panic disorder.*

CURRENTLY PRESCRIBED PSYCHOTROPIC MEDICATIONS

Generic Name	Brand Name	Current Uses
acamprosate	Campral	Alcohol dependence
alprazolam	Xanax	Anxiety, panic
amitriptyline	Elavil	Depression
amoxapine	Asendin	Depression
amphetamine and dextroamphetamine	Adderall	ADHD, stimulant
aripiprazole aripiprazole lauroxil	Abilify <u>Aristada injection</u>	Schizophrenia, Depression
asenapine	Saphris	Schizophrenia, Bipolar disorder
atenolol	*Tenormin	Anxiety
atomoxetine	Strattera	Adhd, Non-stimulant
brexipiprazole	Rexulti	Schizophrenia, Depression
brexanolone	Zulresso	Depression, others
buprenorphine	Suboxone, Subutex	Opiate-narcotic dependence
buprenorphine and naloxone	Bunavail (app 6/14)	Opiate-narcotic Dependence
bupropion	Wellbutrin	Depression, adhd, tobacco dependence
buspirone	BuSpar	Anxiety
Carbamazepine	*Tegretol	Bipolar disorder
cariprazine	Vraylar	Schizophrenia, bipolar disorder
chlordiazepoxide	Librium	Anxiety
chlorpromazine	Thorazine	Schizophrenia
citalopram	Celexa	Depression, panic, anxiety
clomipramine	*Anafranil	OCD, depression
clonazepam	*Klonopin	Panic, anxiety
clorazepate	Tranxene	Anxiety
clozapine	Clozaril	Schizophrenia
desipramine	Norpramin	Depression,ADHD
desvenlafaxine	Pristiq	Depression
dexmethylphenidate	Focalin	ADHD, stimulant
dextroamphetamine	Dexedrine	ADHD, stimulant
diazepam	Valium	Anxiety
disulfiram	Antabuse	Alcohol dependence
divalproex sodium	Depakote	Bipolar disorder
doxepin	Sinequan	Depression
duloxetine	Cymbalta	Depression
escitalopram	Lexapro	Depression
esketamine	Spravato	Depression, other
exxua	Gepirone	Depression, other
fluoxetine	Prozac	Depression, OCD, panic, anxiety
fluphenazine	Prolixin, Prolixin Decanoate	Schizophrenia
fluvoxamine	*Luvox	OCD, depression, panic, anxiety
gabapentin	*Neurontin	Bipolar disorder
guanfacine	Intuniv	Adhd, Non-stimulant
haloperidol	Haldol, Haldol Decanoate	Schizophrenia
hydroxyzine	Vistaril, Atarax	Anxiety
iloperidone	Fanapt	Schizophrenia

Generic Name	Brand Name	Current Uses
imipramine	Tofranil	Depression, panic
lamotrigine	*Lamictal	Bipolar disorder
isocarboxazid	Marplan	Depression
levetiracetam	Keppra	Anti-seizure Mood stabilizer
levomilnacipran	Fetzima (app 7/13)	Depression
lisdexamphetamine	Vyvanse	ADHD, stimulant
lithium carbonate	Eskalith, Lithobid, Lithonate, Lithotabs	Bipolar disorder
lorazepam	Ativan	Anxiety
loxapine	Loxitane	Schizophrenia
lurasidone	Latuda	Schizophrenia
methadone	Methadose, Dolophine	Opiate-narcotic dependence
methylphenidate	Ritalin, Concerta Daytrana	ADHD, stimulant
mirtazapine	Remeron	Depression
naloxone	Narcan/DAWN	OD antidote
naltrexone	Vivitrol, Revia, Depade	Alcohol / Opiate-narcotic dependence
nefazodone	Serzone	Depression
nortriptyline	Pamelor	Depression
olanzapine	Zyprexa, Zyprexa Relprevv	Schizophrenia
oxazepam	Serax	Anxiety
oxcarbazepine	*Trileptal	Bipolar Disorder
paliperidone	Invega, Invega Sustenna	Schizophrenia
paroxetine	Paxil	Depression, panic, OCD, anxiety
perphenazine	Trilafon	Schizophrenia
phenelzine	Nardil	Depression
propranolol	*Inderal	Anxiety
protriptyline	Vivactil	Depression
quetiapine	Seroquel Seroquel XR	Schizophrenia
risperidone	Risperdal, Risperdal Consta	Schizophrenia
selegiline	Emsam	Depression
sertraline	Zoloft	Depression, panic, OCD, anxiety
thioridazine	Mellaril	Schizophrenia
thiothixene	Navane	Schizophrenia
topiramate	*Topamax	Bipolar disorder
tranylcypromine	Parnate	Depression
trazodone	Desyrel Oleptro	Depression
trifluoperazine	Stelazine	Schizophrenia
trimipramine	Surmontil	Depression
valproic acid	Depakene	Bipolar disorder
varenicline	Chantix	Tobacco dependence
venlafaxine	Effexor	Depression
vilazodone	Viibryd	Depression
vortioxetine	Trintellix	Depression
ziprasidone	Geodon	Schizophrenia
